KENSEIDEN

Round Select:

Before turning on the system, press and hold BUTTONS ONE and TWO. Turn on the system, and continue to hold them down until the Title Screen with the figure appears. Release BUTTONS ONE and TWO, and hold the UPPER LEFT corner and BUTTON ONE. A round select screen will follow.

Preparing to fight:

This game offers training sessions (Rounds 5, 6, 8, etc.). Use these sessions before you begin to battle the levels. If you are able to get through these, you will not only be ready to fight the Warlocks, but you'll receive a lot of energy, and possibly an additional life!

Hidden Items:

To enter the secret room in the round 2, make your way to the room with the Buddha. Jump up to his head, and press up and then jump. In this room, you will find a Gourd of Life. Once received, exit the room, and proceed left. When on the Balcony, use the red steps towards the left. Keep moving left to another balcony, enter the door here, and proceed as before to the Buddah's room. Here too, there is a secret room containing a Gourd of Life.

In round four, go up four levels, and in the upper-right hand corner platform, and you will find Kokeshi (a Wooden Doll) on the platform. She will give you one additional life.

Warlocks:

Fire Wheel:

Jump and hit it, 8-9 times, when you are on the left side, and away from the wall a bit. Avoid the flames that he shoots at you, and move to the right side of the screen.

When it is destroyed, you will receive the High Jump technique.

Benkei:

Move your character to about the middle of the word "power", on the top of the screen, kneel down and use sword attacks to his knees 9-10 times. He carries a club, so watch out!!

When he is destroyed, you will receive the Helmet Splitting Sword (with this sword, you can use it without jumping).

Larva Fly:

When she flies, stay in the left corner. Kneel down and use the Helmet Splitting Sword towards the tail area 9-11 times.

When it is destroyed, you will receive the second Helmet Splitting Sword.

**Two Headed Creature:**

Use the Helmet Splitting Sword, and attack the lower head first. It takes 6-7 shots to kill the first head. After that is destroyed, use jumping attacks with the Helmet Splitting Sword to finish it off. It takes 7-8 hits to kill the second head.

When it is destroyed, you will receive the Air-Cutting Sword (will let you walk and swing the sword).

**Putrid Eye:**

Jump and use the Helmet Splitting Sword at the center of the Eye 6-8 times, while avoiding the Acid Tears.

When it is destroyed, you will receive the Wild Wheel Sword.

**Death Head:**

Use the Wild Wheel Sword and attack 15-16 times, while in the large form. Try to stay on the other side of the screen, when he changes to the Swarm.

When it is destroyed, you will receive the Sword of the Dragon.

**Yonensai, the Master - Three stages:**

- A. When you enter the castle, go up staircase number four. When you are at the top of the stairs, there is a Warlock, throwing Fire Balls. Use the Helmet Splitting Sword to slash downward toward the Fire Balls. There are about 5 to 6 sets of Fire Balls. Once they are all taken care of, the Warlock will vanish. They take about 6-7 shots each.
- B. Next is the Warlock in Armor. Hit him in the head 6-7 times, using the Helmet Splitting Sword. Jump up and slash down at his face. Hit him enough times, and his face will turn into a skull. If it doesn't turn into a Skull, his meter will not go down. Watch out for the falling rocks. This time, when you have beaten him, his face will change to a blue color.
- C. The Final Battle! When he has changed to a Skull face, use the Helmet Splitting Sword, 10-12 times, to his face. This guy's meter will start to go down right away (the two prior stages, his meter didn't move). When defeated, he will blow up.
